

OUR CUSTOMERS LOVE IT!

Our existing equipment did a good job, but we needed to be able to guarantee the flatness that only a Stretcher Leveler could deliver. We considered other manufacturers, but decided to go with Red Bud. Their machine offered the best features and they had the most experience and expertise. They were also able to retrofit their system into our existing equipment. We were so impressed, we bought two. We have to say, we were surprised with the ease of installation. It took very little time to be trained to run the equipment. Red Bud provided excellent training, and they were very professional. Everything they said happened. Now that the units are in operation, they are performing even better than we expected. Our customers love it!
